### INTRODUCTION

The files contained in the Real Estate Assessment Data Extract defined as CSV (comma separated values) files are, in fact, “bar” or “pipe” delimited. The first record of each file is a header containing the data field names.

The files are designed so they can be loaded into any application that can import delimited data.

NOTE: the application you are using may have a limit to the number of records it is capable of handling.

If you have any questions, please email them to the [assessor@stlouisco.com](mailto:assessor@stlouisco.com).
